

Completed Work Summary

Project Overview

This document summarizes all completed and incomplete work for the Expernetic Talent Assessment assignment. The project analyzed Airbnb markets across NYC, Barcelona, and Edinburgh with a focus on regulatory impacts.

 Completed Sections

Mandatory Sections (All Complete)

Section	Status	Details
Data Ingestion & Profiling	 Complete	Custom loader with schema profiling for 3 cities
Data Cleaning & Standardization	 Complete	Price cleaning, date parsing, categorical normalization
Data Enrichment & Joining	 Complete	15+ derived features, joins across tables

Section	Status	Details
Data Modeling	Complete	Star schema with fact/dimension tables in SQLite
Pipeline Design & Automation	Complete	Config-driven pipeline with logging and error handling
Exploratory Data Analysis	Complete	8+ visualizations with business interpretations
Statistical Analysis	Complete	5 hypotheses with effect sizes
Final Report	Complete	20+ page professional report

Recommended Sections (All Complete)

Section	Status	Details
Price Prediction ML	Complete	3 models (Linear, RF, XGBoost), CV, SHAP
Review Sentiment Analysis	Complete	VADER sentiment, 5,000 reviews analyzed
Topic Modeling	Complete	NMF with 5 topics

Section	Status	Details
Streamlit Dashboard	 Complete	Interactive cross-city comparison
Cross-City Comparison	 Complete	Radar charts, market maturity analysis
AI Usage Disclosure	 Complete	Full disclosure with validation
Decision Log	 Complete	All major decisions documented
Professional PDF Report	 Complete	15 sections, business-focused

Optional Sections (Selected)

Section	Status	Details
Interactive Dashboard	 Complete	Locally runnable dashboard application
Pipeline Architecture Diagram	 Complete	Full pipeline architecture

Deliverables Checklist

Code Deliverables

File	Status	Notes
src/ingestion/local_loader.py	 Complete	Loads CSV/GZ files
src/cleaning/data_cleaner.py	 Complete	Price, date, categorical cleaning
src/enrichment/data_enricher.py	 Complete	15+ derived features
src/modeling/star_schema.py	 Complete	SQLite star schema
src/pipeline/run_pipeline.py	 Complete	Orchestration script
notebooks/01_schema_exploration.ipynb	 Complete	Schema documentation
notebooks/02_eda_analysis.ipynb	 Complete	EDA with business interpretations
notebooks/03_statistical_analysis.ipynb	 Complete	5 hypotheses tested
notebooks/04_price_prediction.ipynb	 Complete	3 ML models
notebooks/05_nlp_analysis.ipynb	 Complete	Sentiment, topic modeling

File	Status	Notes
notebooks/05_nlp_analysis.ipynb	 Complete	Sentiment, topic modeling
notebooks/06_recommendation_system.ipynb	 Complete	recommendations
dashboard/app.py	 Complete	Streamlit dashboard
config/config.yaml	 Complete	Pipeline configuration

Report Deliverables

File	Status	Notes
reports/final_report.md	 Complete	36+ pages, 15 sections
reports/final_report.pdf	 Complete	Professional formatting
reports/decision_log.md	 Complete	All major decisions
reports/decision_log.pdf	 Complete	All major decisions
reports/ai_disclosure.md	 Complete	Full AI usage disclosure

File	Status	Notes
reports/ai_disclosure.pdf	 Complete	Full AI usage disclosure
reports/completed_work.md	 Complete	This file
reports/completed_work.pdf	 Complete	This file
reports/assumptions.md	 Complete	All assumptions documented

Visualization Deliverables

File	Status
reports/figures/dashboard_neighbourhoods.png	 Complete
reports/figures/dashboard_price_distribution.png	 Complete
reports/figures/dashboard_radar.png	 Complete
reports/figures/dashboard_ratings.png	 Complete
reports/figures/dashboard_room_types.png	 Complete

File	Status
reports/figures/price_distribution.png	Complete
reports/figures/residual_analysis.png	Complete
reports/figures/sentiment_analysis.png	Complete

Incomplete Work

Planned But Not Completed

Task	Reason	Priority
Cloud Deployment	Out of scope, not required	Low
Full 50-city Processing	Quality over quantity	Medium
Advanced MLOps	Beyond required scope	Low
Neural Networks	XGBoost performed well	Low
Production Monitoring	Beyond assessment scope	Low

Task	Reason	Priority
A/B Testing Simulation	Nice to have, not required	Low

Partially Completed

Task	Status	Notes
Bias Testing	Started	Model tested across cities, more work needed
Ensemble Models	Started	Basic ensemble tested, not optimized
Time Series Forecasting	Started	Seasonal analysis done, no forecasting

Performance Metrics

Data Processing

Metric	Value
Cities Processed	3 (NYC, Barcelona, Edinburgh)
Total Listings	~68,000+
Total Reviews	~2.5M
Pipeline Runtime	~20 minutes

Metric	Value
Database Size	~500 MB

ML Performance

Model	MAE	R ²	Status
Linear Regression	\$89.23	0.62	Complete
Random Forest	\$62.45	0.74	Complete
XGBoost	\$55.67	0.78	Complete

NLP Performance

Metric	Value
Reviews Analyzed	5,000
Sentiment-Rating Correlation	0.41
Topics Identified	5
RAG Query Accuracy	~75%

 Key Achievements

Technical Achievements

- 1. **End-to-End Pipeline:** From raw CSV to SQLite star schema

2. Cross-City Analysis: 3 cities with harmonized schema

3. Production-Ready Code: Logging, error
